## Professional Summary

**Fullstack Developer with 2.7+years of experience delivering multitenant web & mobile applications using Angular, NestJS, SQL, Postgres & D3.js.** Built employee engagement platforms, real-time event system, secure document management system, interactive finance dashboards, and an award-winning bulk email campaign system.

## Professional Experience

### **Lead Full Stack Developer (08/2023 – 03/2025)**

**Finstein Technologies Pvt Ltd - Chennai**

- **LedEmployeeEngagementPlatform(Multitenant):** Developed an Angular UI and a NestJS backend featuring real-time notifications, surveys, quizzes, a spin wheel, and role-based access control for both admin and super admin.
- **Led D3.js Finance Dashboard:** Created interactive visualisations, implemented bulk uploading of multiple Excel files with data skip and replace options, and added features for exporting Excel data and generating PDF reports of the dashboard.
- **Led Bulk Email Campaign System (Hackathon):** Designed a category-based scheduling system For email campaign management, which earned me the Achiever Award for outstanding performance.

### **Junior Full Stack Developer (07/2022 –07/2023)**

**Finstein Technologies Pvt Ltd - Chennai**

- **BuiltEvent ManagementSystem(Multitenant):** Built a multitenant event system with calendar tools, ticketing, smart filters, real-time alerts, and QR scanning.
- **Developed Document Management System:** Created a secure document system with encrypted storage, fast search, and approval features using role-based access.

### **Personal Project (03/2025 – 09/2025) Salem**

- **Fullstack TutorialLive:** <https://teal-twilight-956d8.netlify.app/sql/data-types>.
- **Portfolio link:** [sakthivelonestar.github.io/portfolio/](https://sakthivelonestar.github.io/portfolio/).
- An offline data visualisation project created with D3.js.
